Specification	
Vinification	The vineyards are broken into a myriad of at least 20 separate blocks, each picked and fermeted separately. Once harvested, the grapes are optically sorted, cooled and destemmed. Fermentation is in temperature controlled steel tanks, with each vineyard block fermented as an individual wine. After 10 days the wine is transferred into new and used French oak (100%) to finish fermentation. Racking takes place in the Spring, and the wine benefits from 18 months in 100% French oak, with barrels hand-picked.

Press Comments	Wine Merchant Magazine, California Collection, March 2025: "One of the biggest names in the Alexander Valley, Jordan has always looked to Bordeaux as a model, an influence that can be seen in the emphasis the winery places on the importance of ageing. With one of the best-stocked cellars in California, the company is able to release wines with the benefit of bottle age - such as this 2017 vintage. "Gorgeous," the judges said. "A Cab that doesn't hit you in the mouth but instead takes you on an elegant journey through dark fruit and spice."
