# HOUSE OF TOWNEND

FAMILY WINE MERCHANTS SINCE 1906

Specification	
Vinification	The grapes were destemmed and crushed and the stems discarded. The must was pumped to a fermentation vessel; during fermentation, the open pump over method was used. The must fermented at 25-28°C. Pressing took place when the required amounts of colour, flavour and tannin had been extracted; the pressed wine was kept separate. Malolactic fermentation occurred naturally.
